

## Security.

### On Time. Intact.

Regardless of the cargo class, security is always part of the Fastmore focus. Our track record for risk management and loss prevention has blazed the trail for best practices in the category. Since 2005, Fastmore has provided security solutions built on layers of protection and risk mitigation to secure cargo and valuable assets. Fastmore logistics ensure that shipments remain secure, intact and on time. Our clients realize true return on investment as we significantly improve their product time-to-market and eliminate damages in transit.

#### ▶ **Loss Prevention Consulting and Analytics**

Fastmore's technology and partnerships with the industry's leading cargo theft prevention firms gives us access to advanced analytics to improve risk management within the supply chain.

#### ▶ **Route Evaluation and Geo-fencing**

Our team will evaluate and designate the safest route that drivers must follow. Any deviation from those routes is automatically alerted to our team and the customer.

#### ▶ **24/7 Real-Time Monitoring**

Our dedicated cargo tracking team is monitoring hundreds of shipments daily 24/7.

#### ▶ **Carrier Vetting**

Built on years of experience and industry knowledge we developed a rigorous carrier vetting process that improves supply chain security and meets customer compliance requirements.

#### ▶ **Driver Identification Verification**

On-site driver verification and screening available by one of our team members or designated agents.

#### ▶ **Cargo and Asset Tracking**

Fastmore tracking technology provides real-time cargo or asset location 24/7. Additionally, our embedded GPS devices with integrated sensors can provide cargo condition monitoring, including: temperature, humidity, exposure to light and movement.

#### ▶ **GPS Devices**

Rugged packaging allows the GPS tracking devices to be deployed in harsh environments. These devices can accompany the shipment in the trailer, or covertly located in the shipment itself.

#### ▶ **Supply Chain Visibility**

Combining all tracking and technology solutions, we provide full supply chain visibility with real-time tracking, automated status alerts and ETAs.
