

# Utilizing Technology to Ensure Quick Delivery of Electronic PODs

Fastmore's advanced technology ensures rapid delivery of PODs and exceptional visibility through tracking

Our leading technology makes the proof of delivery (POD) image sharing process quick and easy. Through real-time tracking and carrier connectivity, we receive PODs immediately upon delivery and promptly send them to the client. This allows for a much more seamless and expedited process for all parties involved.

## Additional Benefits:

- More than 85% of PODs uploaded to client portal within 30 minutes of delivery
- 95% of shipments have digital tracking for real-time status updates
- Technology-enabled process removes the need to manually handle PODs

**85%**

PODs Available  
in 30 Minutes

**100%**

**95%**

Digital Tracking

## Success Through Automation

Our automation allows for faster POD uploads, which in turn accelerates your invoicing process, helping you get paid sooner. This streamlined approach enhances your ability to meet client demands with ease, delivering exceptional service and real-time visibility.

Industry professionals have expressed their appreciation for our efforts to simplify this process. Leveraging cutting-edge technology to automate each step saves time and increases efficiency from end to end. Additionally, you can continue to count on our readily available experts for further support.

## Client Testimonials

*“Quick delivery of information as well as PODs has been extremely useful. It saves us a lot of time chasing information. Having them all available in your portal is also convenient.”*
