

Partial Truckload

Fastmore's Partial Truckload service is an ideal solution for shipments that are too big for LTL but too small for a full truckload. It is a cost-effective option for shipments of various sizes, as you only pay for the freight space used rather than a full trailer.

Advantages of Custom Partial Truckload

- **No Freight Class Required:** Custom Partial Truckload is better than LTL and saves money by avoiding freight class, reclass fees, and minimum density fees.
- **Reduced Handling to Avoid Damage:** Using a partial truckload carrier reduces the number of stops needed and lowers the risk of damages and claims.
- **Speedy Deliveries:** With fewer stops, partial truckload carriers deliver shipments faster, ensuring seamless operations.
- **Significant Cost Savings:** Partial Truckload can save businesses up to 50% compared to FTL, and they only pay for what they use.

Ideal Partial Truckload Shipment:

- Your shipment size ranges from 6 to 18 pallets
- Your shipment weight ranges from 5,000 to 27,500 pounds
- You use an LTL carrier by adding 5,000 pounds or more
- You ship 10,000 pounds on a dedicated carrier because it's cheaper than LTL
