

Flatbed Services Simplifies Specialized Shipping

We do the heavy lifting with specialized flatbed solutions. We offer a tailored approach to transporting oversized and specialized shipments, maintaining high service standards Fastmore Logistics is known for all its nationwide services.

Advantages of Flatbed Shipping

- **Increased Capacity:** Lighter flatbed trailers provide higher weight capacity for loads too heavy for standard vans. Maximize efficiency without compromising on shipment requirements.
- **Oversize Expertise:** Fastmore specializes in transporting oversized shipments. We facilitate transportation and assist with permitting and escorting vehicles for large loads.
- **No-Dock Delivery:** Flatbed trailers with lower drop decks and side-loading/unloading access eliminate the need for docking upon delivery, making unloading bulkier equipment hassle-free.
- **Customized Options:** Fastmore offers a wide range of flatbed sizes, from 24' to 53'. Our standard 48' flatbeds can handle up to 48,000 lbs, while our 53' flatbeds can handle up to 46,500 lbs.
